FULL STACK DEVELOPER
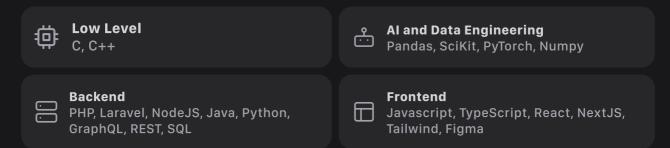

Filippo Scotto

⊙ **Livorno, Italy** 🇮🇹

✉ **filipscotto@gmail.com**

🌐 **https://pippogit.github.io/**

I am a **full-stack software engineer** who loves to work with modern web technologies such as **React** and **NextJS**, but I also have a solid academic background in **computer engineering**, **machine learning**, and **networking**.

Skills

Low Level C, C++	**AI and Data Engineering** Pandas, SciKit, PyTorch, Numpy
Backend PHP, Laravel, NodeJS, Java, Python, GraphQL, REST, SQL	**Frontend** Javascript, TypeScript, React, NextJS, Tailwind, Figma

Work Experience

Implementation of a food delivery platform
Delivery Aggregator SRL - 2022

Platform developed using Typescript, NextJs and ChakraUI. The backend was built using Laravel and PHP with Postgres as database and GraphQL APIs to provide the data.

Design and implementation of a business management platform
Freelance project for ITS Telecomunicazioni SRLs - 2021

Platform developed using Javascript, React and MUI, powered by Google Firebase (auth, file storage and NoSQL Database).

Education

University of Pisa
MSc In Computer Engineering - 110/110 Cum Laude (2021)

Design and development of a visual anomaly detection system based on attention.

University of Pisa
BSc in Computer Engineering - 101/110 (2017)

Computational Stigmery applications to detect New York City's hotspots through pick up and drop off events of taxi races.

ITI G. Galilei Livorno
High School Diploma in Information Technology - 100/100 (2013)
